

Project Design Phase
Proposed Solution Template

Date	7 July 2026
Team ID	SWUID2026200147
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	It is difficult to analyze housing prices and understand the factors that affect them. This project helps users easily analyze housing market trends using interactive dashboards
2.	Idea / Solution description	Develop a Tableau dashboard to visualize housing data such as sale price, house age, renovation status, bedrooms, bathrooms, and floors. The dashboard is embedded into a Flask web application for easy access.
3.	Novelty / Uniqueness	The project combines Tableau dashboards, storyboards, and Flask web integration to provide an interactive and user-friendly data analysis platform.
4.	Social Impact / Customer Satisfaction	It helps buyers, sellers, and real estate professionals understand housing trends and make better decisions using data visualization.
5.	Business Model (Revenue Model)	The dashboard can be used by real estate companies through subscription services or customized analytics reports.
6.	Scalability of the Solution	The project can be expanded by adding real-time data, more locations, and machine learning for house price prediction.
